ASSIGNMENT-4

NAME: D V M KOUSHIK

MAIL: Koushik.18bes7025@vitap.ac.in

Assignment-4:

Develop a mobile application that takes the user input and sends it to IoT device (Python code). print the received data in python shell.

Keep a text box to accept the user input. Integrate a submit button.

whenever user enters the text input in text box and clicks the button the data should be sent to IBM cloud using URL (HTTP API).

Python Code:

```
import wiotp.sdk.device
import time
import random
myConfig = {
    "identity": {
        "orgId": "0jf5nu",
        "typeId": "VITDEVICE",
        "deviceId":"627"
        },
         "auth" : {
             "token" : "12345678"
         }
    }
def muCommandCallback(cmd):
    pritn("Message received from IBM IOT Platform: %s" % cmd.data['command'])
    #m=cmd.data['command']

client = wiot.sdk.device.DeviceClient(config=myConfig, logHandlers=None)
client.connect()

while true:
    client.commandCallBack = myCommandCallback
    time.sleep(2)
client.disconnect()
```
